Morning Joe,

I have seen that the Publication Draft Local Plan is available online as part of the Cabinet meeting agenda pack.

I presume that you have therefore discussed YLL's QC opinion internally and decided not to act on the points raised. Or is this something you are still looking at?

I note from an early review of the document that there are some sites which have been added as allocations which weren't previously. Which is a similar position to YLL's sites and our request for them to be included this time around. Following the provision of the further information we provided over the last few weeks is there the potential to provide an addendum to agenda pack which looks to provide an update on the plan to include YLL's sites?

It would be good to understand the Council's current stance in respect of YLL's sites. At this point, as I trust you would expect, we would need to again object to the Draft Local Plan on the grounds that YLL's sites at Oxspring and Worsborough are not included. Utilising the points raised in the QC's opinion of course.

Any information or an update would be greatly appreciated.

Thanks,

Paul

Apologies Joe,

I forgot to mention the "Blackmoor Business Park" proposals that we submitted last week too. There looks to be strong local support for the idea in response to our initial contact with local members. Is it too late to add this item as an addendum to the plan or to be specifically mentioned to members for future consideration?

Thanks,

Paul
